

Flash Track Lighting's

Color-Changing Tree of Lights Kit

Our 2-Color Changing Spinning Tree of Lights is sold as a complete pre-assembled kit that includes EVERYTHING you need for installation. Once you receive our kit, all you will need to put up your new tree is a hammer, ladder and point of attachment.

Call us at 636-222-7294 or email us at Nick@FlashTrackLighting.com for more information.

Add Our Color-Changing Tree

to your display for only 1/3 the Cost of RGB Lights!

Our Color-Changing Spinning Tree of Lights Kit Includes:

- 32 strands of C9 LED lights, already fully assembled to change between 2 colors, 1 strand at a time
- A custom-built harness in which all of the lights are ALREADY plugged in, with the connections running from the top of the tree to the controller at the ground level
- Our 16-track programmable controller, pre-programmed to change between 2 colors in a series of eye-catching patterns
- 2 pulleys, with the first pulley hooked to our included top bracket with all of the lights attached and with the second pulley hooked to our 2-foot chain for mounting to your attachment point, along with 100 ft of rope
- 16 rebar stakes (each stake is 18 inches long) and 16 bungee cords, both for securing the light strands to the ground
- A large, heavy duty tote with wheels that ships to you with all of the above items included, that can also be used to store your tree of lights in the future

Pricing:

Our 2 Color-Changing Tree of Lights kits are priced by height. We can also sell half-circle tree kits upon request at a reduced price.

This pricing is based on purchase of our full kit, for a 360° circle tree at the selected height, which includes ALL of the items listed on the left. The base of the tree is fully adjustable to the size of your choice.

As an additional option, our programmable controllers can be synced together.
More information about this feature is available upon request.

Our Color-Changing Tree of Lights is EASY To Install:

1. Our tree of lights will be delivered to you in one convenient, heavy duty tote box with wheels. When you open the tote box, you will see that the harness is already plugged into the pre-set controller and that the rope is already installed in the pulleys.
2. To hang your tree of lights, you will need a point of attachment. Your point of attachment can be just about anything you choose—a tree branch, a pole or post of any sort, a rafter, or even a house gable or wall if you are choosing to install a half-circle tree of lights.

3. To hang your tree of lights, pull the lights out of the box from the top bracket, using the pre-assembled pulley to gradually lift the lights up. Unroll each of the 16 strands of lights as you go. Once you reach the top, secure the rope to hold the lights in place. Then, secure your stakes in the ground and attach the bungee cords that are already connected to the lights.

4. Lastly, mount the included controller stand and attach the controller to the stand. Plug in your controller and enjoy your beautiful tree!
