

# Flash Track Lighting's Color-Changing Tunnel Kit

Use our 2-Color Changing Tunnel Kit to upgrade your tunnel to change between 2 colors in a series of eye-catching patterns for only 1/3 the cost of an RGB light display.

Our kit will be custom-made to fit your steel arches and includes pre-assembled light strands with magnetic bases for quick and easy installation along with a custom harness and a controller pre-programmed to change colors.

Call us at 636-222-7294 or email us at [Nick@FlashTrackLighting.com](mailto:Nick@FlashTrackLighting.com) for more information.

# Upgrade Your Arches with Our Color-Changing Tunnel Kit for only $\frac{1}{3}$ the Cost of RGB Lights!

## Our Color-Changing Animated Tunnel Kit Includes:

- 2 strands of C9 LED lights for each of your arches, already fully assembled to change between 2 colors, 1 strand at a time
- A harness custom-built to perfectly fit your arches, both the number of arches you have and the distance between each arch
- Our 16-track programmable controller, pre-programmed to change between 2 colors in a series of eye-catching patterns *(Lower priced controllers are available for smaller arch displays.)*
- A large, heavy duty tote with wheels that ships to you with all of the above items included

## Pricing:

Since our tunnel kits are custom-built to fit your arch frames, pricing will vary depending on the number of arches in your display, the number of bulbs on each arch, and the distance between each of the arches.

This pricing is based on purchase of our full-size kit, which includes a 16 track programmable controller. Lower pricing is available for smaller tunnel displays.

**As an additional option, our programmable controllers can be synced together.** More information about this feature is available upon request.

## Upgrading Your Steel Arches to Change Colors is EASY with our Tunnel Kit:

1. Our tunnel kit will be delivered to you in one convenient, heavy duty tote box with wheels.

2. Once you open the tote, lay out the custom-built harness to mark where to place your arches.

3. Once you have laid out the harness, install the lights on your arches. Each of our light bulbs already has a magnetic base attached to the bottom of the socket. Simply place the light bulbs along your steel frame arches, using the pre-installed magnetic bases for adherence.

4. When you are ready to plug in your display, simply plug the 2 light strands from each arch into the corresponding, color-coded receptacles on the harness, located at the base of each arch.

5. Lastly, mount the included controller stand and attach the controller to the stand. Plug in your controller and enjoy your stunning, upgraded 2-color changing tunnel!
